

The Newton-Nairobi Partnership

The goal of the Newton-Nairobi Partnership

(NNP) is to connect U.S. and Kenyan Presbyterians through Christian fellowship and cooperative Mission. Formally established in 1995, the Partnership has been active in making countless connections and driving long-lasting change. The Partnership seeks to expand both American and Kenyan perspectives for each others culture, faith and practices

We currently focus in three main areas:

- 1) Partnering sister congregations
- 2) Youth scholarship provision
- 3) Support for the Kasasule Health Centre

Support health services for rural people in need at the Kasasule Health Centre

Founded in 2000, the Kasasule Health Centre (KHC) is located among the villages surrounding the small town of Kibwezi, Kenya. The KHC provides essential medical services for 20,000 people in need. The KHC is funded by the Presbyterian Church of East Africa and with your donations.

The Kasasule

Health Centre has been a great example of the partnership between Kenyan and American people. This clinic provides basic services such as malaria treatment, newborn delivery and pre-/post-natal care, and respiratory infections. The centre also hosts Medical Camps where specialists come in for eye care, orthopedic care, and women's health and screening. Over 6,000 checkups and services were provided by this small institution in 2019.

Funding goes to the staff salaries, purchase of medicine, medical camp support, and overall operations.

Basic health services are essential for those in need
